

## 3Com® 3107 Cordless Phone

### DATA SHEET

#### Key Features

- Four programmable buttons with lights
- Nine fixed-feature keys
- One 10/100 uplink port (in base unit)
- Two-line LCD display
- Battery charging cradle with extra battery charging slot
- Rugged handset with added battery life
- No interference with IEEE 802.11 wireless networks
- Up to three phones in one geographical area—a maximum of 13 phones (3106 and 3107 models) without causing interference

#### Ideal for

- Warehouses
- Manufacturing floors
- Office and classroom buildings
- Open work areas

### PRODUCT SUMMARY

The 3Com® 3107 Cordless Phone is designed for users who need a durable phone that lets them range widely (up to 1,000 feet/305 meters from the base unit) while still being able to take advantage of the organization's IP-based voice/data network. Unlike a cell phone, this 900-MHz cordless phone offers full access to NBX® IP telephony system capabilities. Four programmable and nine fixed feature keys make invoking frequently used features fast and simple. The two-line LCD display enables additional access to features and calling information.

The proven, spread-spectrum technology of the 3107 Cordless Phone will not interfere with IEEE 802.11 wireless network radio signals. Up to three phones—each able to handle of to four lines—may operate in the immediate area, connecting to the network through a 10/100 port in the base unit. A separate two-slot battery recharging cradle is included.

Self-locating capabilities save time and service-call expenses, lowering total cost of ownership. Moving a phone involves simply plugging it into a network port at a new location. All personal settings, directory entries, and voice mail travels with the phone.

Browser-based management eases configuration tasks, and web-based support makes advanced features easier to master. What's more, customization capabilities let users do many set-up procedures themselves.
