service terms and conditions

FIBERNET spectrum T1 service is provided in consideration of a minimum one (1) year term at the above monthly minimum usage commitment. Usage is defined as the total charges for all minutes of usage of outbound and inbound service. Minimum Usage is the gross amount of the charges for these minutes before any discounts are applied. Usage does not include taxes, regulated surcharges, T1 access charges, monthly private line charges, equipment rental charges, late charges or any other charges not billed on a per-minute basis. Term commences on date of first usage by customer.

Customer agrees that, in the event it terminates the use of FIBERNET's Telemanagement Services prior to the end of the above term, it shall reimburse FIBERNET an amount equal to (1) any waived installation charge(s), and (2) an Early Termination Fee equal to the amount of the monthly commitment multiplied by the number of months remaining in the term. FIBERNET and Customer agree that the above reimbursement shall constitute liquidated damages and shall be FIBERNET's only remedy for early termination under this Agreement.

Customer also agrees that it recognizes that FIBERNET leases access service from other providers who require reasonable notice. Customer will give FIBERNET 30 days written notice of customer's intention to cancel this agreement at any time.

At the end of the initial minimum term above, this agreement will automatically renew for additional periods equal to the initial minimum term unless cancelled in writing 60 days prior to the end of the initial minimum term or subsequent automatic renewals.
